etc.	etc.	etc.	etc.	etc.	etc.
etc.	etc.	etc.	etc.	etc.	etc.

This is a sample report printout showing how detailed info on the document preparation process can be retrieved using this method. This type of report could sort clauses by most actively modified or by most comments received, or by most comments received with newest modifications made. Other similar reports could include info on users involved with each clause to help identify strong/weak negotiators or possibly draft provisions. Values could be specified in advance to trigger reports then sent via email to alert user + senior management.
